PATIENT CONSENT

REQUIRED

By signing, I confirm all information provided is accurate. I understand this pharmacogenomics (PGx) test analyzes inherited DNA variants to guide medication decisions — it is not a disease diagnosis. Results are permanent and may be relevant to biological family members. I authorize _____ to bill my insurance directly, release necessary medical information for claims and appeals, and retain financial responsibility for any uncovered amounts. I consent to de-identified use of my specimen and clinical information in research studies or publications where appropriate. Having had the opportunity to ask questions regarding the testing, procedure, risks, and alternatives, I authorize _____ to perform this testing.

CERTIFICATE OF MEDICAL NECESSITY, CONSENT, TEST AUTHORIZATION AND PHYSICIAN SIGNATURE

REQUIRED

I attest this pharmacogenomics test is medically necessary based on the patient's active medications and clinical indications documented herein. Per 42 C.F.R. §410.32, results will directly inform a current prescribing decision. I have reviewed the gene composition of the ordered panel and confirm its appropriateness for the clinical question under investigation. I further confirm this patient has not previously received a germline PGx panel under Medicare, patient informed consent has been obtained prior to testing, and all clinical information documented on this requisition — including diagnosis codes, active medications, and drug under consideration — is accurate and complete.
