

Medicare Clinical Laboratory Fee Schedule Private Payer Rates and Volumes Methodology

The data in the Medicare Clinical Laboratory Fee Schedule are gathered from the Fee for Service Data Collection System (FFSDCS). Applicable Laboratories (as defined by the Protecting Access to Medicare Act) submit Applicable Information to CMS via the FFSDCS every three years. These data include Laboratory National Provider Identifier (NPI), HCPCS codes, private payor rates for laboratory tests, and associated volumes of tests furnished. For the purpose of this file, NPIs are removed to maintain laboratory confidentiality. In addition, tests with a reported volume under 10 are also removed to maintain laboratory confidentiality.
